ANSHUMAN PANDEY

SOC ANALYST L1 | SECURITY OPERATIONS ENTHUSIAST

anshn.py@gmail.com | +91 8957654715 | Delhi, India | linkedin.com/in/anshuman-pandey | github.com/anshnpy

PROFESSIONAL SUMMARY

BCA graduate with strong communication, analytical and problem-solving skills. Passionate about cybersecurity and Security Operations. Hands-on experience in building SOC projects involving log analysis, packet analysis and incident investigation. Eager to contribute to a SOC team by monitoring, detecting and responding to security threats and ensuring the security of systems and data.

TECHNICAL SKILLS

- SOC Monitoring & Alert Triage
- Log Analysis & Correlation
- Incident Detection & Response
- SIEM (Wazuh)
- Windows Event Logs
- Network Traffic Analysis
- Wireshark & TCP/IP
- Linux (SSH, Logs, Permissions)
- Python (Scripting)
- Bash Commands
- Malware Analysis (YARA, pefile)
- Threat Intelligence (IOC, Indicators)
- Web Security & Network Security
- Documentation & Reporting
- Problem Solving & Critical Thinking
- Team Collaboration & Communication

PROJECTS

1. **SOC Home Lab / SIEM Dashboard**
   - Built a practical Security Operations environment using Wazuh for security monitoring, alert triage, incident management, threat intelligence, MITRE ATT&CK analysis, case management, reporting and network visibility.
   - Configured log collection, dashboards and custom alerts for Windows and Linux systems.
2. **Incident Response & Investigation Platform**
   - Developed a case-based incident response platform with Wazuh telemetry, alert triage, evidence handling, investigation timelines, IOC analysis, MITRE mapping, response actions, playbooks, reporting and Cloudflare D1 persistence.
   - Focused on real-world SOC workflows for investigation and documentation.
3. **Malware Analysis Sandbox**
   - Built a full-stack malware analysis and threat investigation platform with sample intake, hashes and metadata, strings and entropy analysis, PE analysis, YARA scanning, suspicious pattern detection, IOC investigation, threat scoring and MITRE mapping.
   - Samples are not executed on the host machine. (Static analysis only)
4. **PersistHawk – Linux Persistence & LOLBin Hunter**
   - Developed a Linux security tool to detect persistence mechanisms and suspicious LOLBin usage.
   - Includes scanning for common persistence techniques, suspicious binaries and system changes.
   - Helps in threat hunting and post-compromise investigation.

PROFESSIONAL EXPERIENCE

Cybersecurity Intern | BAVA MEDIA — Dec 2025 – Feb 2026

- Monitored and reviewed system and application logs to identify potential security issues.
- Assisted in alert triage and investigation of suspicious activities.
- Maintained documentation for security findings and incident reports.
- Supported the team in improving security processes and awareness.

Information Security Intern | BONDS — Apr 2026 – May 2026

- Assisted in monitoring security logs and identifying unusual activities.
- Reviewed suspicious events and indicators (IOCs) for further analysis.
- Supported basic endpoint and access security checks.
- Helped in documenting investigation findings and maintaining security records.

Security Operations Intern | ATRASKI INDIA — Aug 2026 – Sep 2026

- Assisted in security monitoring and review of alerts from internal systems.
- Supported incident response by collecting and documenting relevant information.
- Helped in analyzing suspicious activities and potential security risks.
- Collaborated with team members to improve internal security practices and awareness.

EDUCATION

Bachelor of Computer Applications (BCA) — 2023 – 2026 (Completed)

Guru Gobind Singh Indraprastha University (GGSIPU), Delhi

CERTIFICATIONS

- Cisco Ethical Hacker
- Deloitte Australia – Cyber Job Simulation (Forage)

COURSEWORK

Data Analytics | Database Management Systems | Computer Networks | Artificial Intelligence
Software Engineering | Operating Systems | Data Structures

LANGUAGES

- English (Professional)
- Hindi (Native)
